**TOWN OF POUGHKEEPSIE**

**LOCAL LAW NO. \_\_ (PROPOSED) OF THE YEAR 2022**

**A LOCAL LAW TO AMEND CHAPTER 210 OF THE CODE OF THE TOWN OF POUGHKEEPSIE ENTITLED “ZONING” TO INCLUDE PROVISIONS FOR ELECTRIC VEHICLE CHARGING STATIONS**

**BE IT ENACTED** by the Town Board of the Town of Poughkeepsie as follows:

**SECTION 1. LEGISLATIVE INTENT**

This Local Law amends the Town of Poughkeepsie Zoning Law to include provisions for electric vehicle charging stations as an accessory use, and to amend the site plan regulations to provide for future installation of electric vehicle charging stations. The Town of Poughkeepsie is a Climate Smart Community and has pledged to reduce greenhouse gas emissions. Providing for electric vehicle charging stations will reduce greenhouse gas emissions, particularly as sources of electricity convert from fossil fuels to renewable energy. The amendments are designed to protect the health, safety, and welfare of Town residents and to bring the Town's Zoning Law into conformance with “Greenway Connections: Greenway Compact Program and Guides for Dutchess County Communities” pursuant to Chapter 18 of the Town Code. The proposed amendments are consistent with the recommendations of the Town's 2021 *Comprehensive Plan*.

**SECTION 2. APPLICATION**

This Local Law shall apply within the Town of Poughkeepsie.

**SECTION 3. SEVERABILITY**

The invalidity of any word, section, clause, paragraph, sentence, part, or provision of this Local Law shall not affect the validity of any other part of this Local Law, which can be given effect without such part or parts.

**SECTION 4. AMENDMENTS TO ARTICLE II OF THE ZONING LAW ENTITLED “DEFINITIONS AND WORD USAGE”**

*§ 4.1. Section 210-9 of the Code is hereby amended by the addition of the following new definitions:*

## **ELECTRIC VEHICLE**

Any motor vehicle that is registered with the New York State Department of Motor Vehicles that operates, either partially or exclusively, on electrical energy from the grid, or an off-board source, that is stored on-board for motive purposes.

## **ELECTRIC VEHICLE CHARGING EQUIPMENT**

An electrical component assembly or cluster of component assemblies designed specifically to charge batteries within electric vehicles.

## **ELECTRIC VEHICLE CHARGING LEVELS**

The standardized indicators of electrical force, or voltage, at which an electric vehicle's battery is recharged. Levels 1, 2, and 3 are the most common EV charging levels, and include the following specifications:

- (1) Level 1 is considered "slow" charging, typically requiring an amp breaker of 15 to 20 amps on an AC circuit of 120 volts and a standard outlet.
- (2) Level 2 is considered "medium" charging, typically requiring an amp breaker of 40 to 100 amps on an AC circuit of 240 volts.
- (3) Level 3 (DC Fast Charge and Supercharging) is considered "rapid" charging, typically requiring a dedicated breaker of 60 amps or higher on a three-phase circuit of 480 volts or higher with special grounding equipment. DC Fast Charge uses an off-board charger to provide the AC to DC conversion, delivering AC directly to the car battery.

## **ELECTRIC VEHICLE PARKING SPACE**

Any marked parking space that identifies the use to be exclusively for an electric vehicle.

***4.2. Section 210-9 of the Code is hereby amended by deleting the existing definition of "Electric Vehicle Charging Station" and replacing it with the following new definition:***

## **ELECTRIC VEHICLE CHARGING STATION (EVCS)**

A public or private parking space that is served by electric vehicle charging equipment that has as its primary purpose the transfer of electric energy (by conductive or inductive means) to a battery in an electric vehicle. An EVCS may be an Electric Vehicle Parking Space, or it may be a space permitted to be utilized by non-electric vehicles.

## **SECTION 5. AMENDMENTS TO ARTICLE VIII OF THE ZONING LAW ENTITLED "SUPPLEMENTARY REGULATIONS"**

***§ 5.1. Section 210-67.1 of the Code is hereby amended by adding the following new § 210-67.1 and re-designating the current § 210-67.1 as § 210-67.2:***

### **§ 210-67.1. Electric Vehicle Charging Stations.**

#### **A. Applicability.**

- (1) Electric vehicle charging station(s) (EVCS) with a Level 1 or Level 2 charging level shall be permitted in all zoning districts as an accessory use to a single-family dwelling, two-family dwelling, multi-family dwelling, or townhouse to serve the occupants of the dwelling(s).

(2) EVCS with a Level 2, Level 3 or greater charging level shall be permitted as an accessory use to any nonresidential use in all zoning districts subject to site plan review and the design criteria of subsection (2) herein.

(3) Refer to § 210-92S for thresholds when EVCS are required.

B. Design Criteria. The following criteria shall be applied to the location and design of all EVCS associated with any nonresidential use and multifamily dwellings with ten or more dwelling units:

(1) Parking. EVCS shall be located in an existing or proposed parking space developed in accordance with the provisions of § 210-92.

(2) Location. Unless required by subsection B (11) herein, EVCS shall not be located in the most convenient or prime parking spaces that would encourage use by non-electric vehicles.

(3) Equipment shelters. Above-ground electric vehicle charging equipment shall be contained in a Milbank enclosure or equivalent equipment shelter.

(4) Cord management. EVCS shall be provided with a cord management system that keeps cords and connectors off the ground when not in use. Cords shall be retractable or the EVCS shall include a place to hang the cord and connector sufficiently above the pedestrian surface. Any cords connecting the charger to a vehicle shall be configured so that they do not cross a driveway, sidewalk, or passenger unloading area.

(5) Design and screening. Facilities should be able to be readily identified by electric vehicle users, but be compatible with the character and use(s) of the site. The Town may require screening of electric vehicle charging equipment with fences, walls and/or evergreen vegetation.

(6) Equipment protection. Adequate EVCS protection, such as concrete-filled steel bollards, shall be used. Curbing may be used in lieu of bollards if the EVCS is setback a minimum of 24 inches from the face of the curb.

(7) Pavement markings prohibited. No pavement markings or colored pavement shall be permitted other than what is required for standard and accessible parking spaces, and a generic electric vehicle symbol a maximum of 4 square feet in size.

(8) Number. Unless the Town determines otherwise, no more than 10% of the total number of parking spaces that are required to serve the use(s) on the site may be Electric Vehicle Parking Spaces that are exclusively proprietary to a specific brand of vehicle.

(9) Signs.

(a) In addition to any signs required by law and the posting of the information in the following paragraph (b), each EVCS also may include one (1) sign, a maximum of one (1) square foot in size. Said sign shall be incorporated into or affixed to the charging station and shall not be a separate stand-alone sign; it shall not be illuminated, either internally, externally from underneath, above or behind, or with strip lighting or strings of light bulbs, shall not require a sign permit, and shall not be included in the total number of permitted signs for the lot or use to which the charging station is accessory.

- (b) The following information shall be posted on all EVCS: voltage and amperage levels; hours of operations if time limits or tow-away provisions are to be enforced; usage fees; safety information; and contact information for reporting when the equipment is not operating properly or other problems.
  - (c) No audio message or audible electronic devices such as loudspeakers and similar instruments shall be permitted.
  - (d) A small screen/keypad shall be permitted on the EVCS for payment purposes only. With the exception of the foregoing, no visual electronic devices shall be permitted, including but not limited to video screens, television screens, plasma screens, holographic displays, or any other screen that displays moving images.
  - (e) No other signs on the EVCS or for the electric vehicle parking space shall be permitted, including but not limited to electronic message display signs, off-premises signs, or any other type of advertising, other than as may be required by law.
- (10) Lighting. EVCS shall not be internally illuminated, nor shall any external illumination be attached to the EVCS.
- (11) Accessibility. EVCS shall be sited so as not to reduce or impede the accessible features of the site, including but not limited to accessible parking spaces, access aisles and routes, as required by the NYS Uniform Code. Accessible EVCS shall comply with the requirements of the NYS Uniform Code.
- (12) Maintenance. Electric vehicle charging stations shall be properly maintained in all respects, including the functioning of the charging equipment. Charging stations no longer in use shall be removed immediately.

***§ 5.2. Section 210-92 of the Code is hereby amended by the addition of a new subsection S to read as follows:***

- S. Electric Vehicle Charging Stations. Any site plan for a multifamily residential use that proposes ten or more dwelling units, or a nonresidential use that proposes 20 or more off-street parking spaces, shall provide for the installation and use of one or more electric vehicle charging stations (EVCS) in accordance with the following:
- (1) Multifamily residential uses shall include at least one non-proprietary EVCS per ten dwelling units.
  - (2) Nonresidential uses shall provide at least one Level 2 or Level 3 non-proprietary EVCS for every 20 required off-street parking spaces.
  - (3) In the event that the Town determines that the applicant has demonstrated good cause, the Town may waive the installation of some or all of the EVCS facilities otherwise required by this subsection. In such case, the Town may require that a sufficient number of spaces be provided with conduit and such other equipment as may be necessary to enable EVCS to be installed in the future with minimal inconvenience or disturbance of parking areas.
  - (4) An electric vehicle parking space shall be counted when calculating the number of parking spaces required by subsection 210-92.O herein.

6-24-2022 DRAFT

(5) All EVCS shall comply with the design criteria of § 210-67.1B.

**SECTION 6. EFFECTIVE DATE**

This local law shall take effect immediately after it is filed with the Secretary of State as provided in section twenty-seven of the Municipal Home Rule Law.

**PRINT FORM**

**Full Environmental Assessment Form**  
**Part 2 - Identification of Potential Project Impacts**

Agency Use Only [If applicable]

Project : Zoning Text Amendment - EV Charging S

Date : August 3, 2022

**Part 2 is to be completed by the lead agency.** Part 2 is designed to help the lead agency inventory all potential resources that could be affected by a proposed project or action. We recognize that the lead agency's reviewer(s) will not necessarily be environmental professionals. So, the questions are designed to walk a reviewer through the assessment process by providing a series of questions that can be answered using the information found in Part 1. To further assist the lead agency in completing Part 2, the form identifies the most relevant questions in Part 1 that will provide the information needed to answer the Part 2 question. When Part 2 is completed, the lead agency will have identified the relevant environmental areas that may be impacted by the proposed activity.

If the lead agency is a state agency **and** the action is in any Coastal Area, complete the Coastal Assessment Form before proceeding with this assessment.

**Tips for completing Part 2:**

- Review all of the information provided in Part 1.
- Review any application, maps, supporting materials and the Full EAF Workbook.
- Answer each of the 18 questions in Part 2.
- If you answer "Yes" to a numbered question, please complete all the questions that follow in that section.
- If you answer "No" to a numbered question, move on to the next numbered question.
- Check appropriate column to indicate the anticipated size of the impact.
- Proposed projects that would exceed a numeric threshold contained in a question should result in the reviewing agency checking the box "Moderate to large impact may occur."
- The reviewer is not expected to be an expert in environmental analysis.
- If you are not sure or undecided about the size of an impact, it may help to review the sub-questions for the general question and consult the workbook.
- When answering a question consider all components of the proposed activity, that is, the "whole action".
- Consider the possibility for long-term and cumulative impacts as well as direct impacts.
- Answer the question in a reasonable manner considering the scale and context of the project.

**Full Environmental Assessment Form**  
**Part 3 - Evaluation of the Magnitude and Importance of Project Impacts**  
**and**  
**Determination of Significance**

Part 3 provides the reasons in support of the determination of significance. The lead agency must complete Part 3 for every question in Part 2 where the impact has been identified as potentially moderate to large or where there is a need to explain why a particular element of the proposed action will not, or may, result in a significant adverse environmental impact.

Based on the analysis in Part 3, the lead agency must decide whether to require an environmental impact statement to further assess the proposed action or whether available information is sufficient for the lead agency to conclude that the proposed action will not have a significant adverse environmental impact. By completing the certification on the next page, the lead agency can complete its determination of significance.

**Reasons Supporting This Determination:**

To complete this section:

- Identify the impact based on the Part 2 responses and describe its magnitude. Magnitude considers factors such as severity, size or extent of an impact.
- Assess the importance of the impact. Importance relates to the geographic scope, duration, probability of the impact occurring, number of people affected by the impact and any additional environmental consequences if the impact were to occur.
- The assessment should take into consideration any design element or project changes.
- Repeat this process for each Part 2 question where the impact has been identified as potentially moderate to large or where there is a need to explain why a particular element of the proposed action will not, or may, result in a significant adverse environmental impact.
- Provide the reason(s) why the impact may, or will not, result in a significant adverse environmental impact
- For Conditional Negative Declarations identify the specific condition(s) imposed that will modify the proposed action so that no significant adverse environmental impacts will result.
- Attach additional sheets, as needed.

Adoption of this zoning amendment to include provisions for electric vehicle charging stations as an accessory use, and to amend the site plan regulations to provide for future installation of electric vehicle charging stations, will not have a significant adverse impact on the environment. Individual projects may undergo site specific evaluation by the Planning Board as part of the Site Plan review process if necessary. Site specific SEQR review would occur in conjunction with such project review.

**Determination of Significance - Type 1 and Unlisted Actions**

SEQR Status:       Type 1                       Unlisted

Identify portions of EAF completed for this Project:    Part 1               Part 2               Part 3

Upon review of the information recorded on this EAF, as noted, plus this additional support information

and considering both the magnitude and importance of each identified potential impact, it is the conclusion of the  
Town of Poughkeepsie Town Board \_\_\_\_\_ as lead agency that:

A. This project will result in no significant adverse impacts on the environment, and, therefore, an environmental impact statement need not be prepared. Accordingly, this negative declaration is issued.

B. Although this project could have a significant adverse impact on the environment, that impact will be avoided or substantially mitigated because of the following conditions which will be required by the lead agency:

There will, therefore, be no significant adverse impacts from the project as conditioned, and, therefore, this conditioned negative declaration is issued. A conditioned negative declaration may be used only for UNLISTED actions (see 6 NYCRR 617.7(d)).

C. This Project may result in one or more significant adverse impacts on the environment, and an environmental impact statement must be prepared to further assess the impact(s) and possible mitigation and to explore alternatives to avoid or reduce those impacts. Accordingly, this positive declaration is issued.
