POUGHKEEPSIE, NEW YORK**

CONTRACT 2023-01

Addendum No. 1
February 17, 2023

Page 1 of 1

This addendum is issued following the pre-bid meeting on February 7, 2023 at the site and additional follow up questions.

1. A full revised plan set dated 01/25/2023 is included in this addendum. Revisions include; additional drilling pits, revised construction details and inclusion of a Maintenance & Protection of Traffic Detail Sheet.
2. A full revised specification package dated January 2023 is included in this addendum. Revisions include in Division 100 Sections 1 and 2, Division 200 Section 2 and Division 600 Sections 02603, 02671 and 02900.
3. Have any test pits been completed? Mainly concerned about at what depth landfill debris may be encountered and what type of debris.
 - a. Test pits have been completed at various locations along the proposed force main route. Based the results and 4' cover requirements for the new force main, the likelihood of encountering landfill material while direction drilling appears minimal but possible. The landfill horizon was found at 5' below grade at the highest point. Please see attached report for full findings.
4. Who is responsible for surveying of the easements?
 - a. The Town will be responsible for marking out the easements prior to the start of construction.
